Environmental Policy Statement

A1 Services (Manchester) Limited are committed to minimising any adverse impact on the environment from its activities and to continuously improve its environmental performance in the following areas:

- Compliance with all applicable environmental legislation and other specific requirements to which the company subscribes,
- Preventing pollution of land, air and water from the Company's premises and its activities,
- Identifying and managing key risks and ensure that arrangements are in place to respond to foreseeable environmental incidents and emergencies,
- Reviewing the actual and potential impacts of all the Company's activities, including those affecting the local community,
- Minimising energy consumption by improving energy efficiency in line with business needs and implementing the use of renewable energy sources wherever possible,
- Promoting waste minimalization, re-use and recycling and monitoring waste transfer arrangements to ensure compliant disposal,
- Ensuring supplies of goods and services to the Company to adopt best environmental practices and to procure goods from renewable sources wherever possible,
- Demonstrating our responsibility as a good neighbour, by actively supporting environmental initiatives within the local community,
- Striving for continuous progressive improvements in environmental performance through the setting of specific objectives and targets and the development of key target indicators,
- Promote a culture of environmental awareness throughout the Company, by involving employees in environmental programmes and providing training where necessary

Signed

John Walsh
